ASTRA INTERIORS

Mr. Manoker – Wardrobe cut list (4 bedrooms)

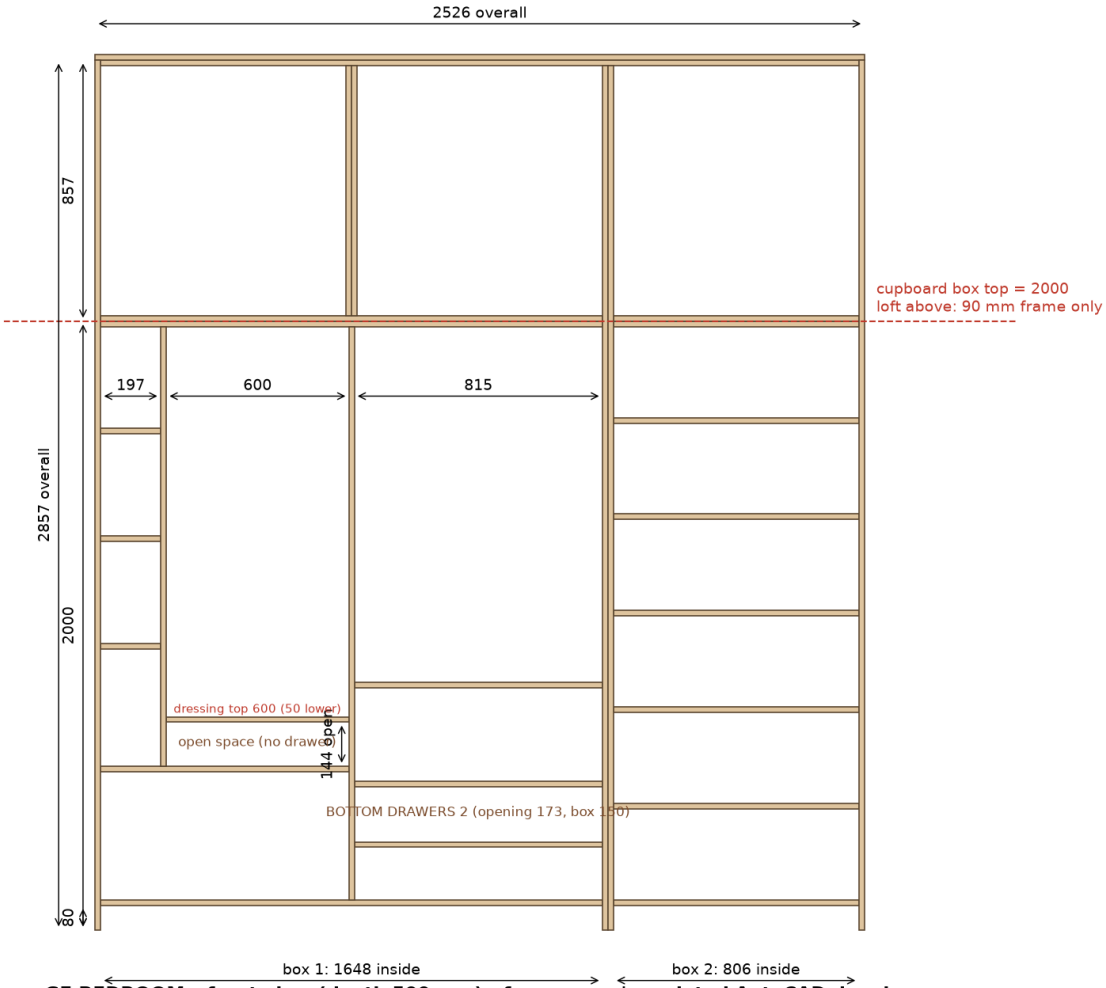

Date: 07-11-2026

Wardrobe	Width	Height	Cupboard box	Loft	Pieces	18 mm sheets	6 mm sheets	LED strip
GF Bedroom	2526	2857	2000 mm	90 mm frame, 857 H	60	6	3	3 pcs / 5.22 m
1st Floor M.Bedroom	2349	2905	2000 mm	90 mm frame, 905 H	54	5	2	3 pcs / 5.08 m
1st Floor Bedroom 2	2319	2895	2000 mm	90 mm frame, 895 H	54	5	2	3 pcs / 5.08 m
2nd Floor Bedroom	2349	2825	2000 mm	90 mm frame, 825 H	54	5	2	3 pcs / 5.08 m

- Board: 18 mm ply for all carcass, shelves and drawers. Back panels: 6 mm ply in a 6 mm groove all round (size includes +12 mm).
- Depth: all wardrobes 500 mm (side / top / bottom). Full-height partitions = 500 (same as side panel, doors are fixed on them; 6 mm back-panel groove on both faces). Inside partitions (dressing / bangle column) = 494. Shelves = 474 (set back 20 mm).
- Every wardrobe is a CUPBOARD BOX 2000 mm high (an 8 ft ply sheet is only 2400 mm long).
- LOFT above the cupboard = 90 mm FRAME ONLY: 90 mm uprights at the ends and partitions + 90 mm top and bottom rails. No loft box, no loft back panel. Loft floor = cupboard top panel.
- GF Bedroom is wider than 2400 mm, so it has 2 cupboard boxes side by side and the loft rails are in 2 pieces – no piece is longer than 2400 mm.
- LED strip-light groove: one vertical groove per cupboard section, 12 mm wide × 8 mm deep, 100 mm from the front edge, on the side / partition face.
- Drawers: bottom 2 drawers only in every bedroom, opening 173, drawer box 150 high. 18 mm frame (sides + front/back inner) with an 8 mm wide x 10 mm deep groove: leave 12 mm from the bottom edge, groove from 12 to 20 mm; the 6 mm drawer bottom slides into the groove (size = inside + 18 mm: 10 mm groove each side, 1 mm play).
- Cut L / Cut W = panel-saw size (front edge minus 0.5 mm edge tape). Add saw kerf when marking out.
- Shutters: 6 doors per bedroom (2 per section), 18 mm ply + laminate, full overlay, 3 mm gaps, 2 mm edge tape on 4 sides (Cut = finished - 4 mm). Drawer section: doors only above the drawers; the 2 drawers have outside fronts in shutter material.

GF Bedroom wardrobe

2526 W × 2857 H × 500 D · cupboard box 2000 mm + loft 90 mm frame only · cupboard clear 1884 mm

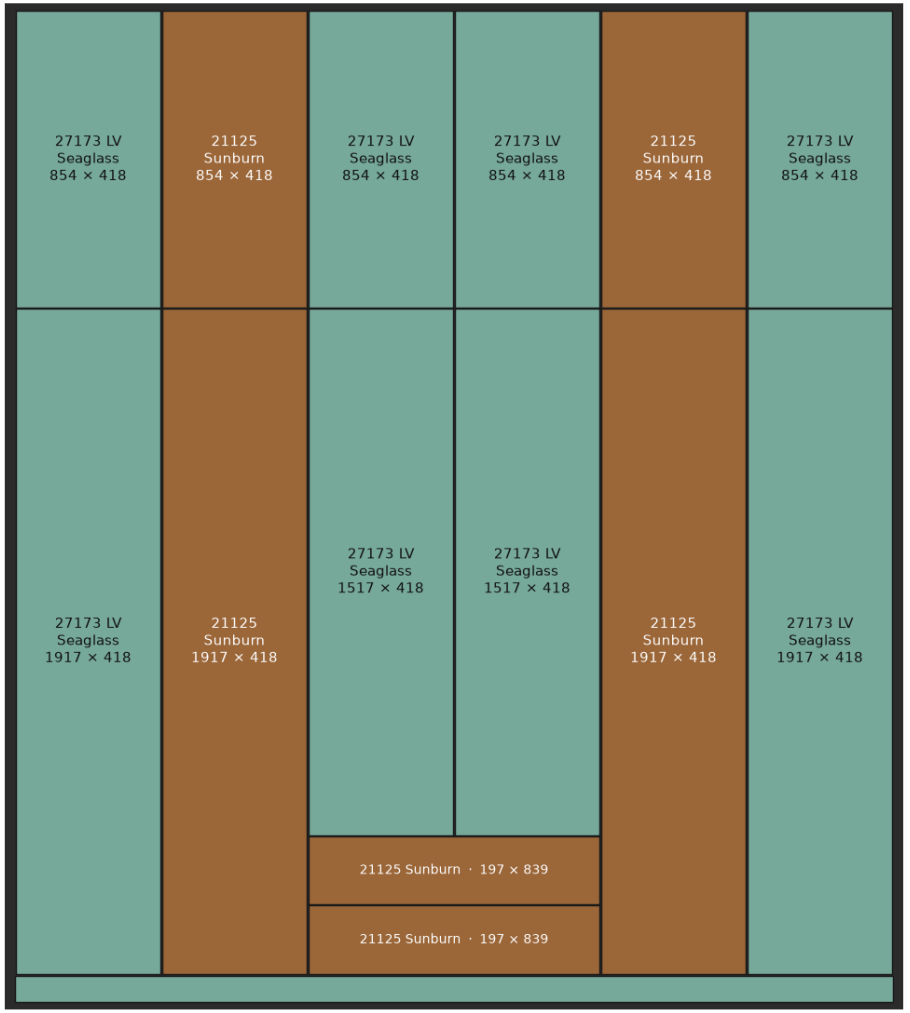

GF BEDROOM – front view (depth 500 mm) · from owner's updated AutoCAD drawing

2D drawing (owner's AutoCAD): cupboard box 2000 mm high; loft above = 90 mm frame only (uprights + top/bottom rails). LED strip groove in each cupboard section.

GF Bedroom – shutters with Merino laminate

2526 W × 2857 H × 500 D · 6 doors + 6 loft doors + skirting

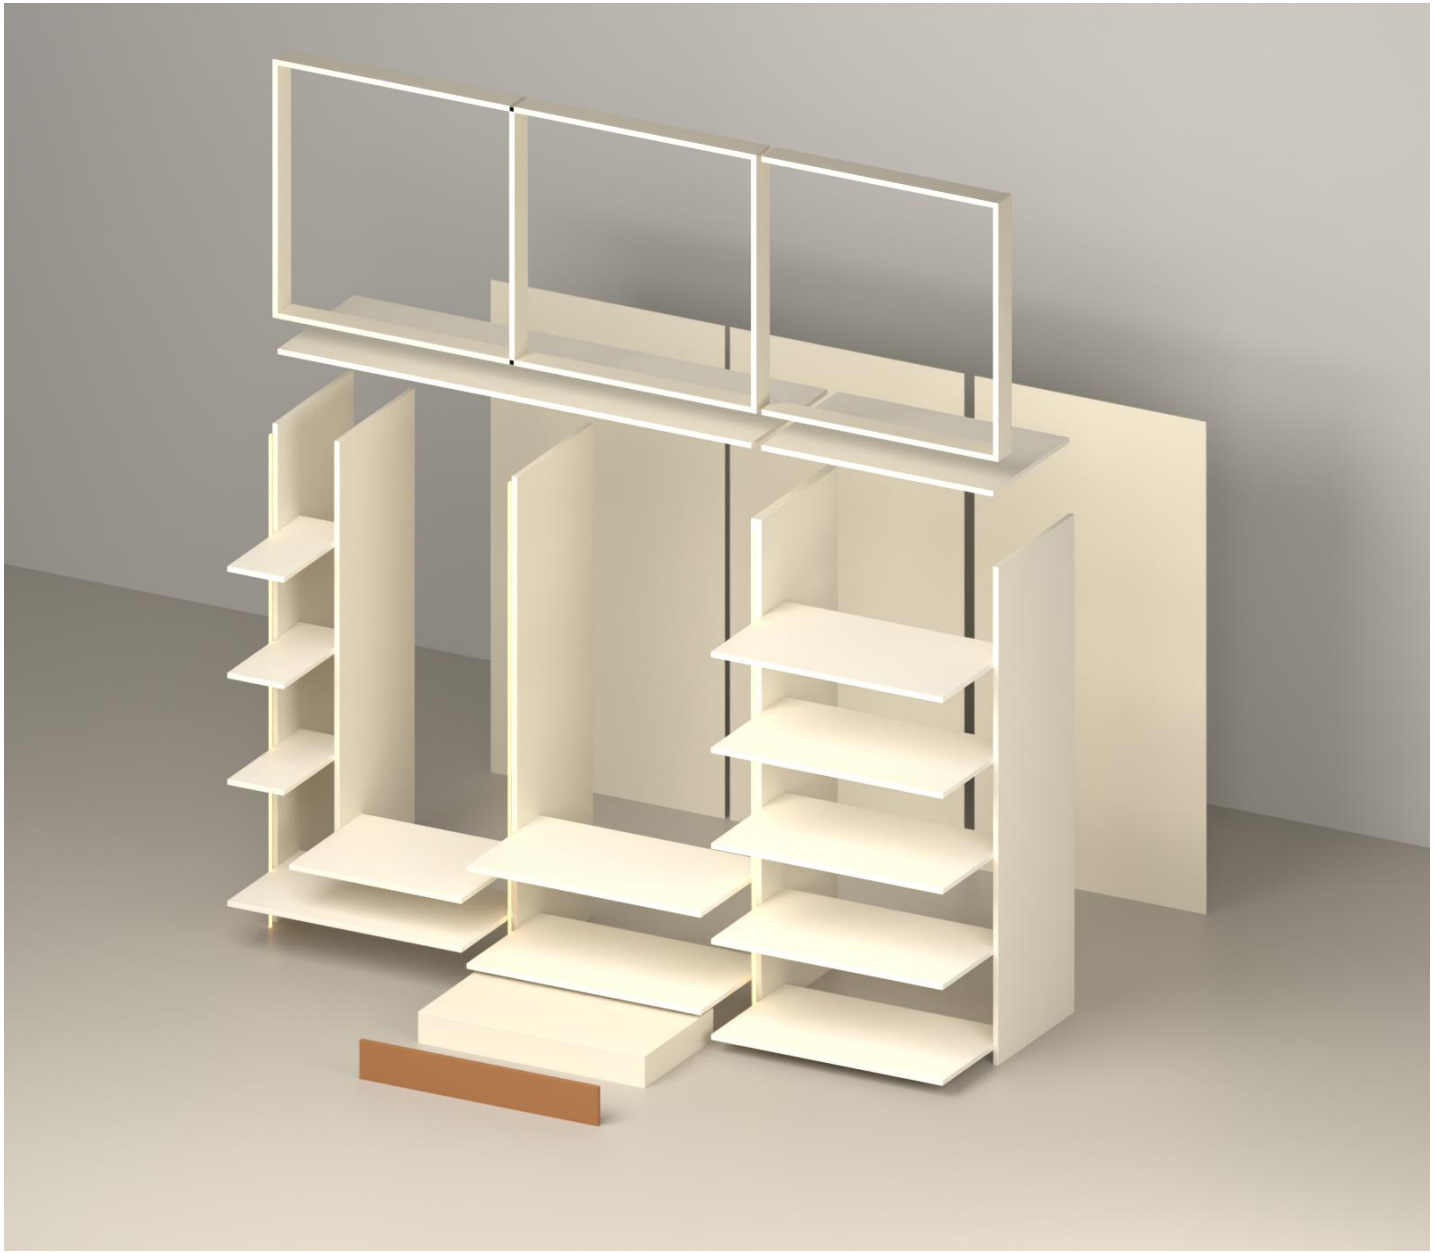

GF BEDROOM

27173 LV Seaglass (green) + 21125 Sunburn (brown)

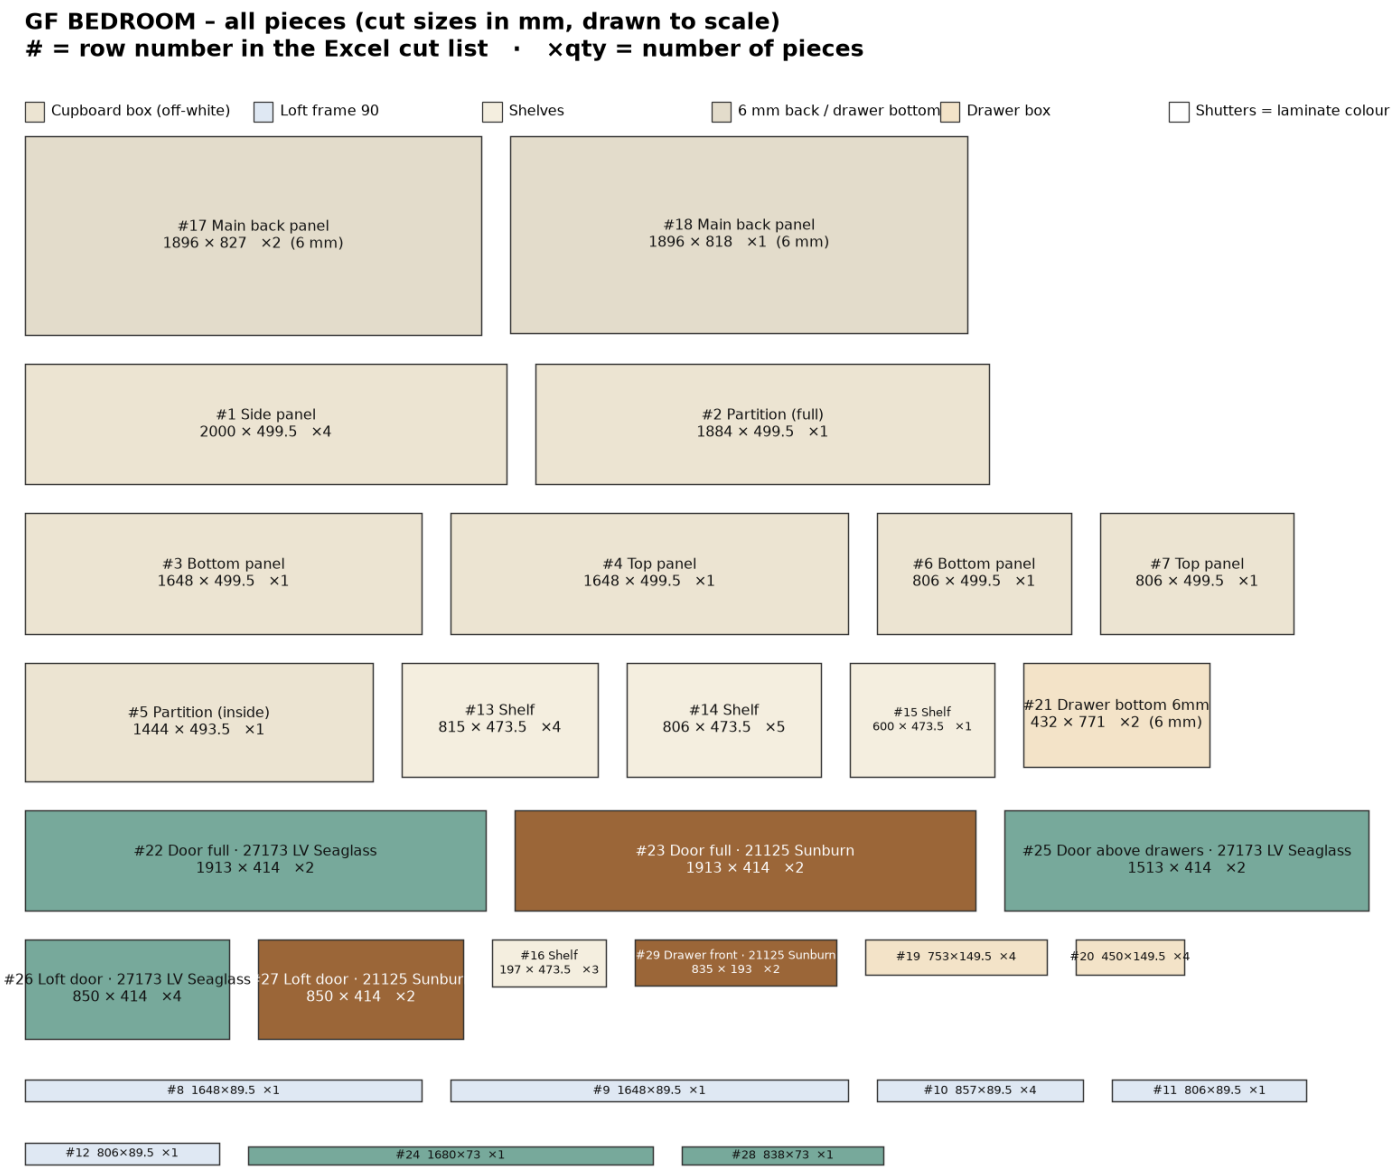

GF Bedroom – 3D model – assembled box without doors (off-white carcass, LED strips, drawer fronts)

GF Bedroom – 3D model – exploded view of the pieces

GF Bedroom – All pieces drawn to scale – # = row number in the cut list

GF Bedroom wardrobe – cut list

Material	Area sq.ft / length	8×4 sheets (15% waste)	Hardware / item
18 mm ply	146.4	6	LED strip light + aluminium profile (in grooves): 3 pcs, 5.22 m total
6 mm back ply	57.6	3	LED driver + door sensor switch: 1
18 mm ply + Merino laminate (shutter)	76.9	3	Soft-close telescopic channels 450 mm (pairs): 2
Edge tape 0.5 mm (front edges)	42 m		Drawer handles / profile: 2

Edge tape 2 mm (shutters, 4 sides)	57 m		Concealed soft-close hinges (doors): 40
			Door handles: 6

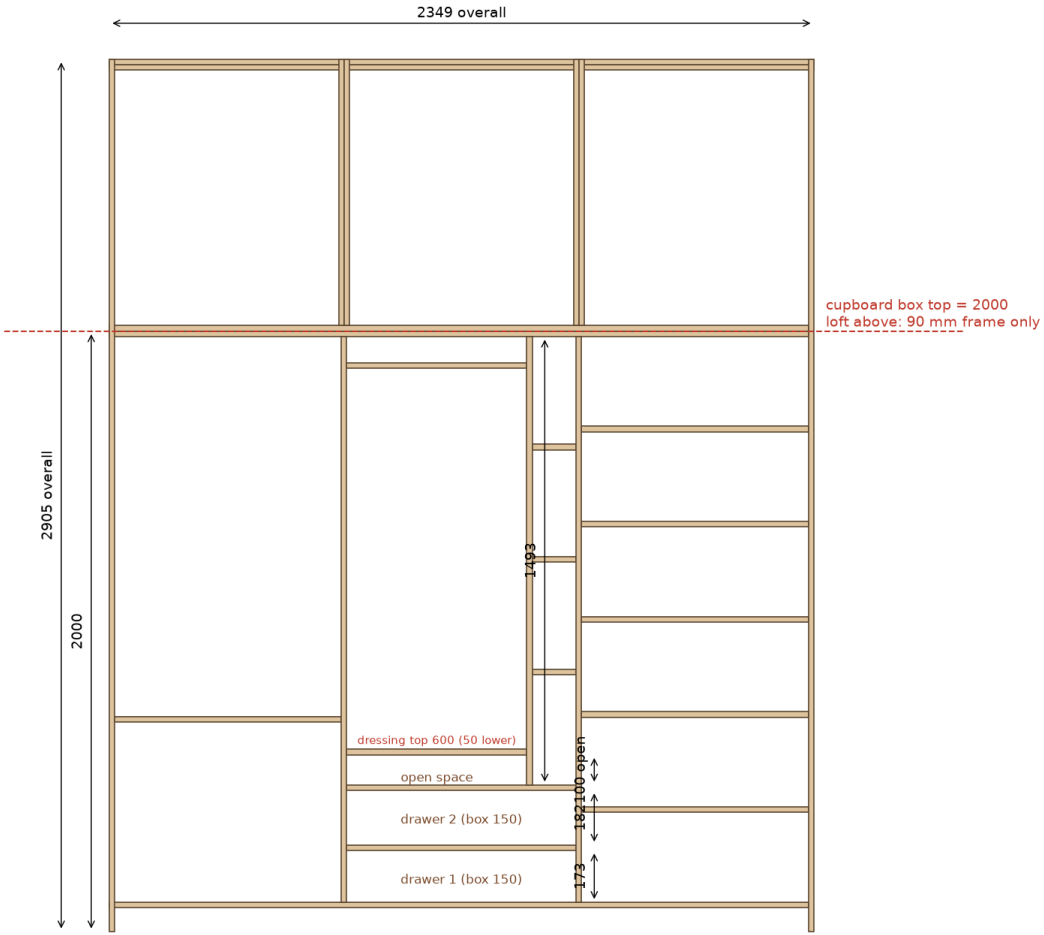

LED strip light – profile groove cutting

Groove 12 mm wide × 8 mm deep, 100 mm from the front edge, vertical, on the panel face inside the section. Start is measured from the top of the bottom panel; groove runs up to the underside of the top panel. Drill a 10 mm wire hole through the top panel at the groove top. Keep shelf screws clear of the groove.

Section	Opening W	Panel	Groove on	From front	Groove start	Groove length	Profile + strip
1	815	Side panel	right face (inside section)	100 mm	0 mm	1884 mm	1864 mm
2	815	Partition	right face (inside section)	100 mm	373 mm (above drawers)	1511 mm	1491 mm
3	806	Side panel	right face (inside section)	100 mm	0 mm	1884 mm	1864 mm
Total							**5.22 m**

1st Floor M.Bedroom wardrobe

			Door handles: 6

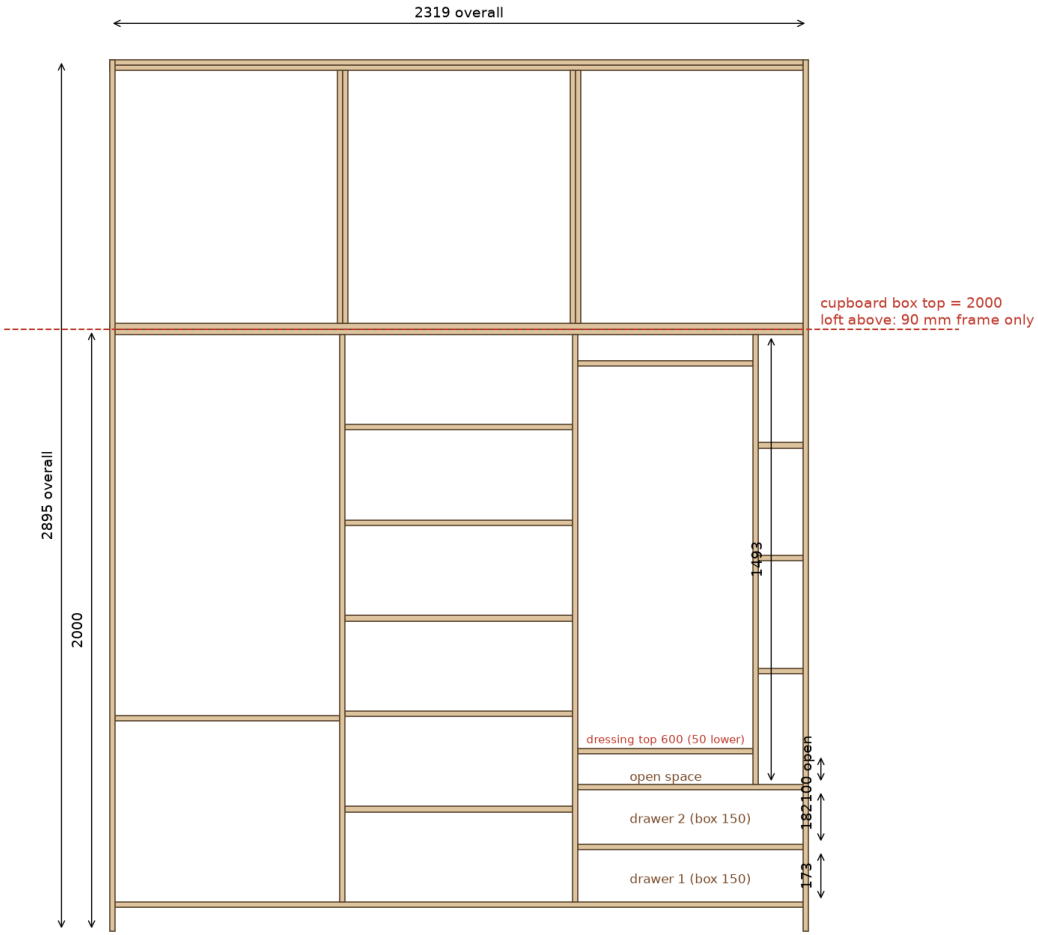

LED strip light – profile groove cutting

Groove 12 mm wide × 8 mm deep, 100 mm from the front edge, vertical, on the panel face inside the section. Start is measured from the top of the bottom panel; groove runs up to the underside of the top panel. Drill a 10 mm wire hole through the top panel at the groove top. Keep shelf screws clear of the groove.

Section	Opening W	Panel	Groove on	From front	Groove start	Groove length	Profile + strip
